

## FLOATING FLOOR

### MINERAL WOOL FLOATING FLOOR

ISONELL floating floors are made of mineral wool covered with plating. They have C, A-30 and A60 class certificates.

These characteristics make ISONELL floating floors long lasting to corrosion and easy to be installed by the fitter.

| DESCRIPTION          | FF5, FF3              | F30                   | F60                   |
|----------------------|-----------------------|-----------------------|-----------------------|
| Class:               | C                     | A-30                  | A-60                  |
| Thickness:           | 53mm, 30mm            | 53mm                  | 53mm                  |
| Core material:       | Mineral wool          | Mineral wool          | Mineral wool          |
| Covering:            | Galvanized steel      | Galvanized steel      | Galvanized steel      |
| Standard dimensions: | 1975 x 475mm          | 1975 x 475mm          | 1975 x 475mm          |
| Approx. weight:      | 30.5Kg/m <sup>2</sup> | 32.5Kg/m <sup>2</sup> | 35.5Kg/m <sup>2</sup> |
