

PANELS

WET PANELS

ISONELL also makes wet panels. The Isonell wet panels can be supplied in 25 mm, 50 mm and 100 mm thickness and rated classification according to B-15/B-0 or A-60.

The only difference with the standard panel is that this panel has a U shaped steel piece on the bottom which allows fitting on the flat bar which is usually fitted dividing the wet and dry areas. These panels are used as division panels of dry and wet areas or as division of wet areas.

These panels may be reinforced with a galvanized steel plate, on one or both sides. This type of panel is usually necessary for fitting of parts which are suspended on the bulkhead.

ISONELL provide the necessary profile system for the mounting of these panels.

DESCRIPTION	PANEL 25mm	PANEL 50mm	PANEL 100mm
Classification:	B-15	B-15	A-60
Thickness:	25 mm	50 mm	100 mm
Base material:	Mineral Wool	Mineral Wool	Mineral Wool
Length:	Up to 3.000 mm	Up to 3.000 mm	Up to 3.000 mm
Standard width:	555mm / 935mm	555mm / 935mm	555mm / 935mm
Weight:	16 kg/m ²	20 kg/m ²	28 kg/m ²
Insulation acoustic:	Rw=29 dB	Rw=34 dB	Rw=35 dB
